DailyMed Drug Label: Amoxicillin Capsules, USP

Reference Identifier: NDA 050542 / DailyMed Reference | **Official Publication:** Revised January 2024 | **Category:** Public Regulatory Guidance

1. Description and Pharmaceutical Characteristics

Amoxicillin is a penicillin-class antibacterial indicated in the treatment of infections due to susceptible strains of designated microorganisms. Available in 250 mg and 500 mg oral capsules.

Chemically, amoxicillin is (2S,5R,6R)-6-[[(2R)-2-amino-2-(4-hydroxyphenyl)acetyl]amino]-3,3-dimethyl-7-oxo-4-thia-1-azabicyclo [3.2.0]heptane-2-carboxylic acid trihydrate.

Each capsule contains amoxicillin trihydrate equivalent to either 250 mg or 500 mg of anhydrous amoxicillin.

2. Indications and Clinical Usage

Amoxicillin is indicated for infections of the ear, nose, and throat, genitourinary tract, skin and skin structures, and lower respiratory tract caused by susceptible isolates.

To reduce the development of drug-resistant bacteria and maintain effectiveness, amoxicillin should be used only to treat infections proven or strongly suspected to be caused by susceptible bacteria.

3. Dosage and Administration

Dosing for adults: 500 mg to 875 mg every 12 hours or 250 mg to 500 mg every 8 hours depending on severity and site of infection. Administer without regard to meals.

Treatment should be continued for a minimum of 48 to 72 hours beyond the time that the patient becomes asymptomatic.

4. Storage, Packaging, and Handling

Store at 20°C to 25°C (68°F to 77°F); excursions permitted to 15°C to 30°C (59°F to 86°F). Dispense in a tight container as defined in the USP. Keep out of reach of children.

Do not use if the tamper-evident packaging seal has been damaged or disturbed.
