VERIDIAN PHARMA LTD. — Quality & Compliance Directorate, Hyderabad Facility

Standard Operating Procedure: Change Control Management

Document ID: SOP-QA-021	**Version:** 1.0	**Effective Date:** 2026-05-05
Owner: Meera Rao (QA Head)	**Department:** Quality Assurance	**Status:** Effective

1. Purpose

To establish a comprehensive and systematically managed change control procedure for evaluating, executing, and documenting modifications to manufacturing processes, analytical methods, facilities, utilities, equipment, and GMP documentation at Veridian Pharma Ltd., Hyderabad.

Uncontrolled changes pose severe risks to product quality, validated status, and regulatory filings. This protocol ensures that all intended changes are critically assessed by subject matter experts prior to implementation.

Adheres to ICH Q10 Pharmaceutical Quality System and WHO GMP guidelines.

2. Scope

Applies across all departments and systems impacting Good Manufacturing Practices, including engineering, production, QC, QA, warehouse, and IT infrastructure.

Covers raw material specifications, equipment modifications, analytical testing methodologies, automation software updates, and manufacturing master formula revisions.

Mandatory for all full-time employees, project engineers, and external technical consultants.

3. Responsibilities

• **Change Initiator:** Document technical justification, propose detailed action plans, and submit change requests via the enterprise QMS portal.

• **Technical Review Committee:** Perform multi-disciplinary impact assessments spanning regulatory, validation, and product quality factors.

• **QA Head (Meera Rao):** Provide final approval, assign regulatory classification, and formally close change control files after verification.

4. Procedure

4.1 Change Proposal Submission: Any proposed modification to validated equipment, facilities, raw materials, or documentation must be initiated through the change control system.

4.2 Categorical Classification: Changes classified Minor / Major / Critical.

4.3 Executive Authority Signoff: Major and Critical need QA Head approval.

4.4 Impact Assessment Timetable: Impact assessment within 10 working days.

4.5 Cross-Functional Technical Reviews: Subject matter experts from engineering, production, QC, and regulatory affairs conduct risk assessments during the evaluation window to identify potential adverse effects.

4.6 Action Plan Formulation: An action plan with discrete deliverables and responsible owners must be established prior to implementation.

4.7 Pre-Implementation Quality Authorization: Implementation activities must not commence until formal QA approval has been granted.

4.8 Post-Implementation Verification: Post-implementation verification must be executed to ensure the change achieved intended objectives without adverse consequences.

4.9 Regulatory Closure and Document Archival: The change control record is formally closed upon completion of all action items and regulatory filing updates where applicable.

5. Records and Documentation

Change Control Form CC-01 dossiers, risk assessment matrices, regulatory filing impact assessments, and change closure certificates must be permanently stored in the digital QMS.

6. Revision History

Version	Effective Date	Change Description
1.0	2026-05-05	Initial release of change control management procedure.
