VERIDIAN PHARMA LTD. — Quality & Compliance Directorate, Hyderabad Facility

Standard Operating Procedure: Batch Record Review and Lot Disposition

Document ID: SOP-QA-030	**Version:** 1.0	**Effective Date:** 2026-03-28
Owner: Meera Rao (QA Head)	**Department:** Quality Assurance	**Status:** Effective

1. Purpose

To define the mandatory procedure for reviewing Executed Batch Manufacturing Records (BMR) and Batch Packaging Records (BPR), along with supporting analytical certificates and environmental monitoring data, prior to the commercial or clinical lot release of drug products at Veridian Pharma Ltd., Hyderabad.

The review process confirms that each lot is manufactured, sampled, packaged, and tested in absolute conformance with approved master production instructions, validated parameters, and regulatory authorizations.

Protects patients from receiving out-of-specification, sub-potent, or adulterated pharmaceutical formulations.

2. Scope

Applies to all finished dosage forms, oral solid dosage products, sterile injectables, and bulk intermediate lots manufactured at the Hyderabad production site.

Encompasses both commercial batches and clinical trial materials produced under cGMP controls.

Governs manufacturing line supervisors, packaging managers, QC release analysts, and QA disposition auditors.

3. Responsibilities

• **Production Operations Supervisor:** Verify shift entries, sign operational checks, reconcile raw material yields, and assemble executed dossier packages.

• **QA Batch Review Specialist:** Conduct systematic page-by-page technical audits of batch records, verify calculations, and check environmental traces.

• **QA Head (Meera Rao) / Designated Approver:** Conduct the independent final verification and authorize the final commercial lot disposition certificate.

4. Procedure

4.1 Dossier Submission from Manufacturing: Executed Batch Manufacturing Records (BMR) and Batch Packaging Records (BPR) must be submitted to QA immediately following production completion along with all raw line reconciliation sheets.

4.2 Technical Auditing of Process Logs: The QA reviewer examines all process parameter entries, signatures, timestamps, and environmental monitoring reports to identify any unauthorized excursions.

4.3 Review Completion Timeline: Review completed within 5 working days of batch completion.

4.4 Dual Independence Requirement: Two-person check: reviewer and approver must be different people.

4.5 Yield and Material Reconciliation Verification: All calculated yields, reconciliation percentages, and weight printouts must be verified against established specifications.

4.6 Investigation Reconciliation Mandate: Any discrepancies, deviations, or OOS investigations associated with the batch must be resolved and closed prior to approval.

4.7 Integration of QC Analytical Reports: All analytical certificates of analysis (CoA) must be matched and attached to the batch dossier before lot disposition.

4.8 Formal Lot Disposition Certification: Upon satisfactory completion of review, the QA Approver issues the Certificate of Compliance for market or clinical distribution.

5. Records and Documentation

Executed BMRs, executed BPRs, QA review checklists, weight tickets, and lot release certificates must be cataloged in secure physical document archives.

6. Revision History

Version	Effective Date	Change Description
1.0	2026-03-28	Initial release of batch record review procedure.
